Notice to Sponsors/Youth Groups

Throughout the day students and staff will learn ways to help make our schools a safer place for all to attend. Speakers will focus on how to affect change in your schools in a positive way. Part of the afternoon session will be a brainstorming session where students work together with other students from different schools to come up with ideas to help affect change in our schools.

BEFORE YOU COME AND ATTEND:

If your school has a Crime Stoppers program/presence, please take the time to make and bring a poster(s) about how Crime Stoppers may already be encouraging positive change in your school. On the poster(s), please put the following information:

1. The name of your school/program.
2. A brief description of how you use Crime Stoppers.
3. A summary of any costs and where you received your money.
4. A description of the positive results Crime Stoppers has brought to your school.
5. Your contact information along with phone contact number, e-mail address, Facebook account, etc. (so others may contact you)

The posters will be posted around the conference meeting room and will be an important part of developing new ideas for our schools to affect change. During breaks, attendees can go around the room to find interesting ideas and take pictures so those schools can be contacted after the conference for follow up.

If your school is coming from a distance, please contact me for overnight accommodations.
